Research Interests

I am interested in natural language processing and generation, machine learning, deep learning, and the study of reliable interconversion between natural language and different forms of data. My long-term research goal is to use artificial intelligence to turn natural language into a bridge to various tasks.

Education

University of Southern California Los Angeles, CA
M.S. in Machine Learning and Data Science Aug. 2021 - May. 2023
GPA: 4.0

Xidian University Xian, Shaanxi
B.E. in Telecommunications Engineering Sep. 2017 - Jun. 2021
GPA: Top 10%

Publications

Few-shot Code Generation via Rule-AI Co-learning from Document
Jiasheng Gu, Zifan Nan, Dongkuan Xu, Xipeng shen
In prep, ACL

Robustness of learning from task instructions
Jiasheng Gu, Hanzi Xu, Liangyu Nie, Wenpeng Yin
Submitted, EACL

Artificial Intelligence Related Techniques Used in Recent Bio-medical Publications
Jiasheng Gu, Lili Wang, Soroush Vosoughi
Submitted, Journal of Medical Internet Research (JMIR)

Research Experience

North Carolina State University
- Mentors: Dongkuan Xu, Xipeng Shen Aug. 2022 – Present
- Project: Zero-shot Code Generation via Rule-AI Co-learning from Document
- Contribution: Proposed a zero-shot code generation framework combining rule-based and AI-based methods to generate DSL code.
- Publication: ACL in prep

University of Southern California
- Mentors: Peter A. Beerel Aug. 2022 – Present
- Project: Designing visual networks with very low FLOPs
- Contribution: Proposed a dilated depthwise convolution that captures global information and extensive experiments are done on it.

Pennsylvania State University
- Mentor: Wenpeng Yin June. 2022 - Oct. 2022
- Project: Robustness of learning from task instructions
- Contribution: Experimented and analyzed the robustness of the instruction-tuned model on perturbed instructions.
- Publication: EACL submitted

Dartmouth College

- Mentor: Soroush Vosoughi — May. 2022 - Sep. 2022
- Project: Analysis of artificial intelligence techniques used in biomedical publications
- Contribution: Proposed a method to analyze artificial intelligence techniques used in biomedical publications.
- Publication: JMIR submitted

University of Southern California

- Mentor: Pedro Szekely — Jan. 2022 - May. 2022
- Project: Integrating factual information from language models into knowledge graph embeddings
- Contribution: Improved link prediction task by factual information mined from language models via prompts.

University of Southern California

- Mentor: Massoud Pedram — Aug. 2021 - Dec. 2021
- Project: Reduced-Memory-Access Inference of Deep Neural Networks
- Contribution: Integrated PyTorch distributed data-parallel framework into the flow to support multi-GPU processing.

ETH Zürich

- Mentor: Yuyi Wang — June. 2020 - Oct. 2020
- Project: Designing pre-training tasks for text summarization
- Contribution: Using trained metrics to find the highest importance sentences as summaries makes the pre-training task more effective.

Industry Experience

Lime

- SDE internship — May. 2022 - Aug. 2022
- Reengineered a system for extracting and computing features to make it easier to modify feature definitions and compute features more efficiently.

Umer Technology

- NLP internship — Apr. 2021 - Aug. 2021
- Deployed a medical named entity identification system via BERT+CRF.

Transwarp

- NLP internship — Jan. 2021 - Apr. 2021
- Established an NLP system to summarize the text through Tensorflow in the environment built by Nvidia Docker.

Professional service

Program Committee

- The European Chapter of the ACL (EACL) 2023
- ACM International Conference on Web Search and Data Mining(WSDM) 2023

Teaching Experience

Teaching assistant, University of Southern California

- EE 503: Probability for Electrical and Computer Engineers — Fall 2022
- Grading course work and answering questions for students.

Awards

Master of Science (M.S.)

- Masters Students Honors Program (USC) — 2021

Bachelor of Engineering (B.E.)

- ZTE Algorithm Competition, Regional Winner Award 2020
- Third Class Scholarship (Xidian University) 2019

Skills

Programming
Python, C++, C, R, Java, SQL, JavaScript, HTML, MATLAB
Framework
PyTorch, Tensorflow, OpenCV, NumPy, Scikit-Learn, SciPy
Professional Softwares
Git, LaTeX, SPSS, Mathematica, AWS, GCP, Docker, MongoDB
